

XX European Congress
of Herpetology
Milan, 2-6 September 2019

PROGRAM & ABSTRACTS

UNIVERSITÀ
DI PAVIA

DEGLI STUDI
UNIVERSITÀ
BICOCCA

m nm Museo di Storia
Naturale di Milano

Organising Institutions:

Societas Europaea Herpetologica (www.seh-herpetology.org)
Università degli Studi di Milano (www.unimi.it)
Università degli Studi di Pavia (www.unipv.it)
Museo di Storia Naturale di Milano (<https://www.comune.milano.it/museostorianaturale/>)
Università degli Studi di Milano-Bicocca (www.unimib.it)

Local Organising Committee:

Gentile Francesco Ficetola, Roberto Sacchi, Stefano Scali, Raoul Manenti, Edoardo Razzetti, Emilio Padoa-Schioppa, Chiara Trabella, Marco Mangiacotti, Andrea Melotto, Mattia Falaschi, Alan Coladonato

Scientific Committee:

Gentile Francesco Ficetola, Roberto Sacchi, Stefano Scali, Raoul Manenti, Alan Coladonato, Andrea Melotto, Mattia Falaschi, Edoardo Razzetti, Marco Mangiacotti, Stefano Canessa, Andrea Villa, Claudia Corti, Isolde van Riemsdijk, Ben Wielstra, Jan-Dieter Ludwigs, Gianpaolo Montinaro, Jelka Crnobrnja-Isailović, Mathieu Denoël, Antigoni Kaliontzopoulou, Dan Cogalniceanu, Judit Vörös, Petros Lymberakis, Marco Zuffi, Marco Sannolo

Secretariat:

Martina Muraro, Elisabetta Gozzo

Herp photos:

Mattia Falaschi, G. Francesco Ficetola, Andrea Melotto, Daisy Pensotti

We explored some of the life history traits of *Triturus ivanbureschi* and *T. macedonicus*. These two species hybridize and form a large introgressive zone in central Balkan Peninsula which follows the specific species displacement scenario: *Triturus macedonicus* widens its range and transects the range of *T. ivanbureschi*. One of the important questions is whether, in the hybrid zone, one species has advantage over the other in reproduction or survival. During three consecutive years, we compared reproductive potentials of the two species in common garden experiments. The females of both species were introduced both to conspecific males and males of the other species. We monitored their reproductive success: proportions of egg-laying females, the total number of deposited eggs, and dynamics and duration of oviposition. Our results indicate that fecundity is largely influenced by environmental factors as well as females' affinities towards males, but specific differences in reproductive potential between the species were not found.
